POCKET WORKS · PRODUCT INTRODUCTION

ClockPoint

Time tracking for small businesses — month-end close in half a day instead of three.

For
HR & office managers

Presented by
Pocket Works

Date
16 November 2026

WHAT WE'LL COVER

Four questions, in the order you'd ask them.

AGENDA

01

Where the three days go

Paper and spreadsheet timesheets, 40 missed clock-ins, shifting labor law.

02

What ClockPoint does

Four capabilities: capture, alert, export, accrue.

03

What changes, measured

Customer averages, plus Northshore Manufacturing's 85-person switch.

04

Price and first week

$3 per person per month, and a four-step start.

THE PROBLEM

Three things make month end the worst week of your month.

3 days

Adding up the timesheets

Paper cards and spreadsheets are keyed in, totalled and checked by hand every month end.

40

Missed clock-ins to chase

About forty gaps a month, each one an email, a corridor conversation or a guess.

The law

Keeping up with the changes

Labor law keeps moving, and nobody in the office is confident the records would hold up.

WHY IT COSTS SO MUCH

Every gap in the record becomes manual work later.

Day 1–2 · Collect

Cards come in incomplete

Paper timecards and spreadsheet tabs arrive from each team, 40 entries missing.

→

Day 2 · Chase

Someone chases the gaps

Each missed clock-in needs a person asked, an answer remembered and a note written in.

→

Day 3 · Total

Totals are keyed by hand

Hours, overtime and leave are re-typed into payroll — the one place a typo is expensive.

THE RESULT

3 days gone

Overtime is only visible after the month has closed — too late to do anything about it — and the audit trail is whatever the paper happens to say.

ClockPoint closes each of those gaps with one feature.

Clock in three ways

Phone, badge reader or PC. People use whichever suits their job — the record is one record.

Fixes → incomplete cards

Overtime alerts before the line

Automatic alerts when someone is about to pass 40 overtime hours in a month — while you can still act.

Fixes → law anxiety

One-click payroll export

Export straight into 5 payroll systems. No re-typing, so no typos to find later.

Fixes → hand-keyed totals

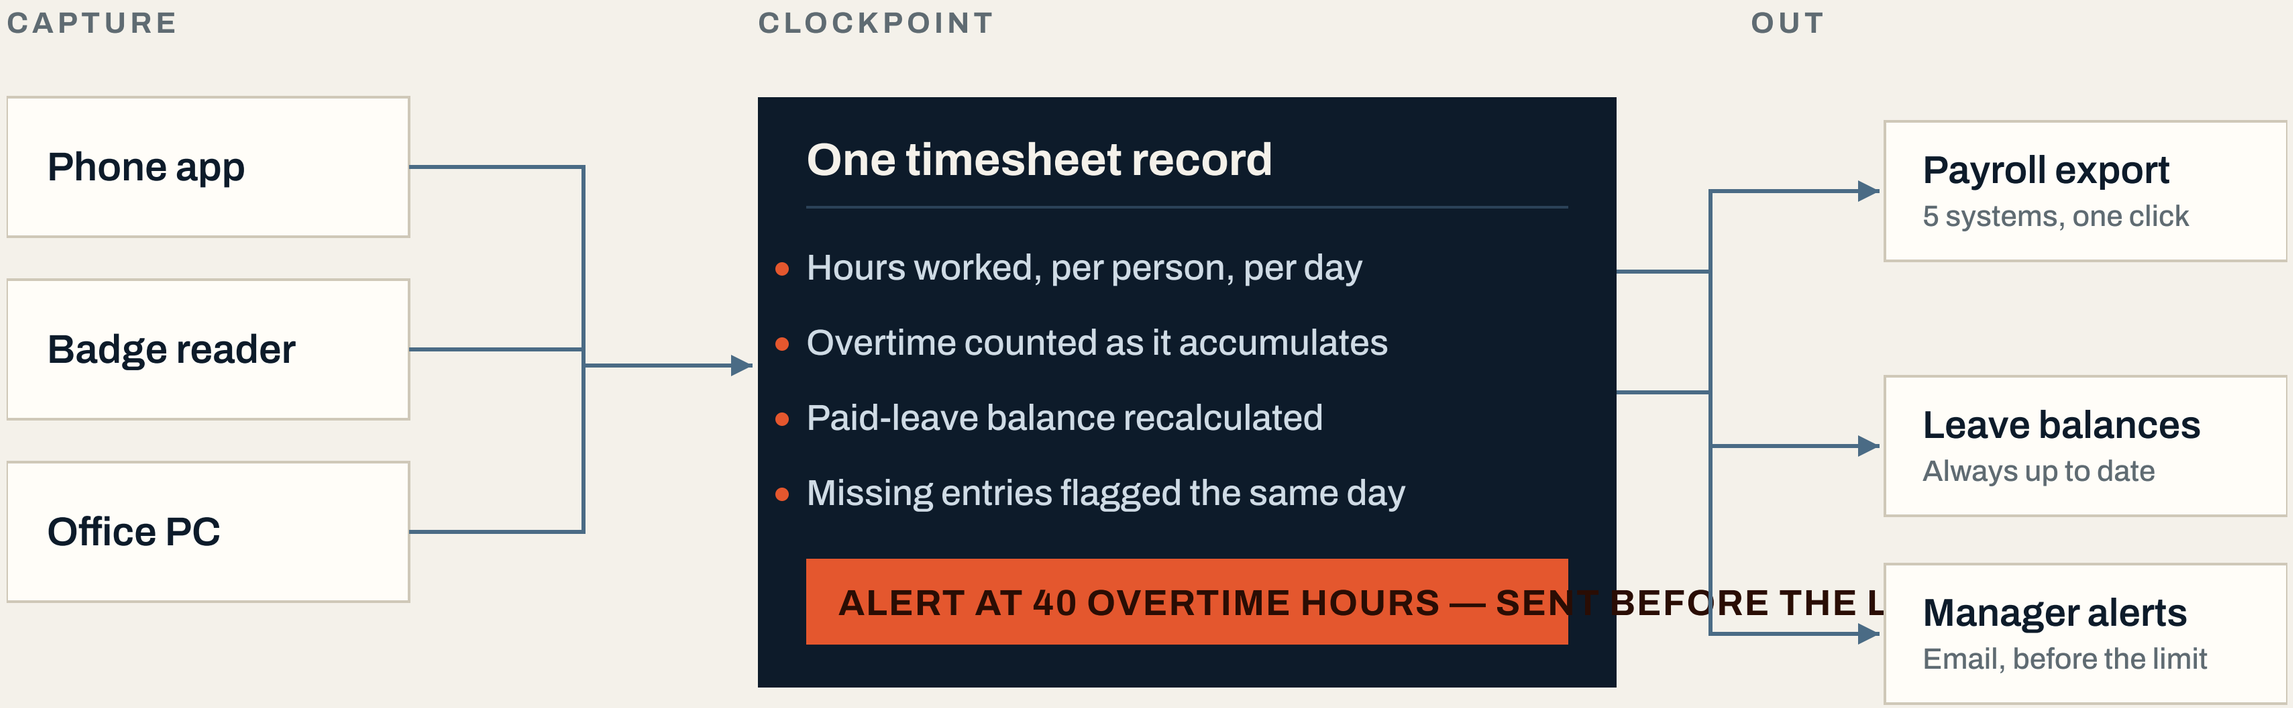

Paid leave counts itself

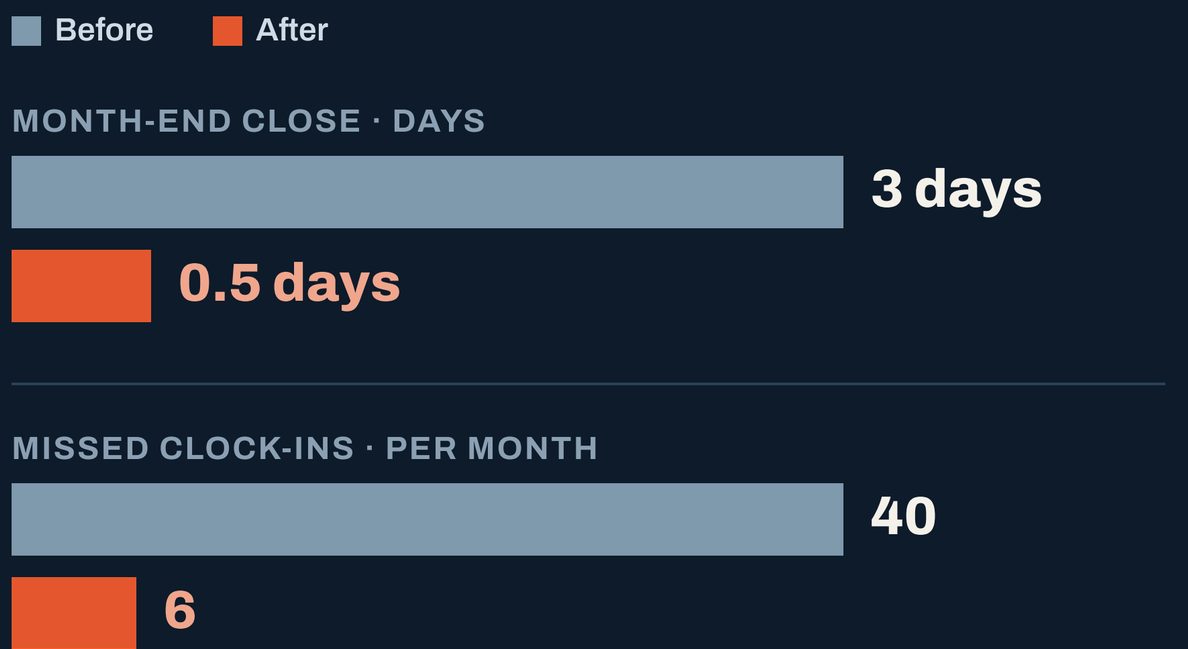

Paid-leave balances update automatically, so the answer to "how many days do I have left?" is always current.

Fixes → leave spreadsheets

One record, captured once, flowing straight to payroll.

Three days of closing becomes *half a day*.

Bars drawn to scale within each pair. Averages across ClockPoint customers.

AND THE HOURS THEMSELVES

−18%

Overtime down 18% year on year. When managers see the hours building up, they move the work before the limit, not after.

3,200
companies using ClockPoint

98%
renewal rate

85 people left paper timecards behind in two weeks.

Office work saved every month

22h

Twenty-two hours a month that used to go into collecting, chasing and totalling timecards.

The company

Northshore Manufacturing · 85 employees · came from paper timecards

WEEK	WHAT HAPPENED
Week 1	Setup session, staff list loaded, badge readers placed at both entrances.
Week 2	Shop floor on badges, office on PC, team leads on the phone app. Paper stopped.
First month end	Hours exported to payroll in one click instead of three days of adding up.
Since	22 hours of office work a month returned to the people who were doing it.

SWITCHED IN 2 WEEKS · FROM PAPER TIMECARDS · 85 EMPLOYEES

PRICING

Three dollars a person a month, and nothing to pay to start.

$3 per person per month

- ✓ **No setup fee.** The one-hour setup session is included.
- ✓ **Minimum 10 people.** Below that, ClockPoint isn't the right fit.
- ✓ **30-day free trial.** Run a full month end on it before you decide.

What it costs at your size

EMPLOYEES	PER MONTH	PER YEAR
10 (minimum)	$30	$360
25	$75	$900
50	$150	$1,800
85 (Northshore)	**$255**	**$3,060**

Calculated at $3 per person per month. No setup fee, so the first invoice is the monthly fee and nothing else.

Four steps, and you can be live in a week.

Sign up

Start the 30-day trial. Nothing to pay.

STEP 1

Setup session

One hour, online, with us on the call.

STEP 2

Tell your staff

Phone, badge or PC — whichever fits the job.

STEP 3

Go live

Paper stops. First export at the next month end.

STEP 4

AS FAST AS ONE WEEK

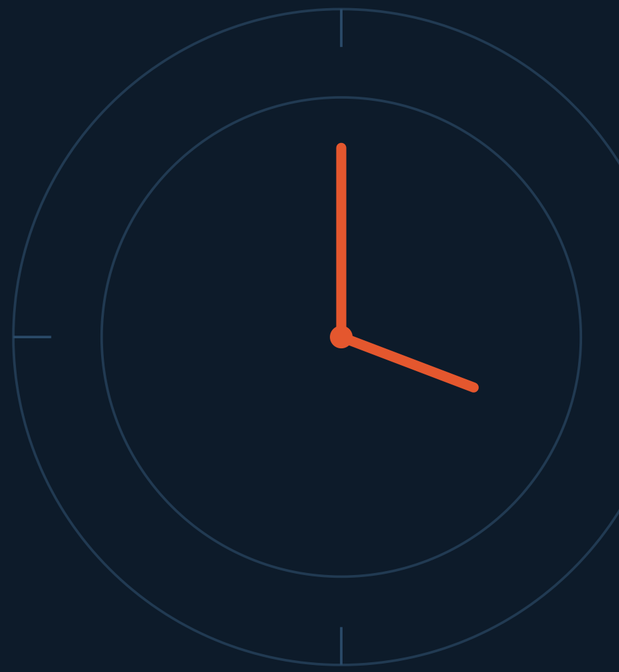

What you'd be buying, in four lines.

01	**Month end shrinks from 3 days to half a day**	One record captured by phone, badge or PC, exported to payroll in a click.
02	**Missed clock-ins fall from 40 a month to 6**	Gaps are flagged the same day, not discovered three weeks later.
03	**Overtime is managed before the limit, not after**	Alerts at 40 overtime hours; overtime down 18% year on year.
04	**$3 per person per month, live in a week**	No setup fee, minimum 10 people, 30-day free trial. 3,200 companies, 98% renewal.

NEXT STEP

Start the 30-day trial and run one month end on it.

Nothing to pay, no setup fee. One hour with us to get set up, and your next close is half a day instead of three.
